Use-Case Specification: Change Settings

1. Use-Case Name

1.1 Brief Description

In “Change Settings” you could change your password or your display name.

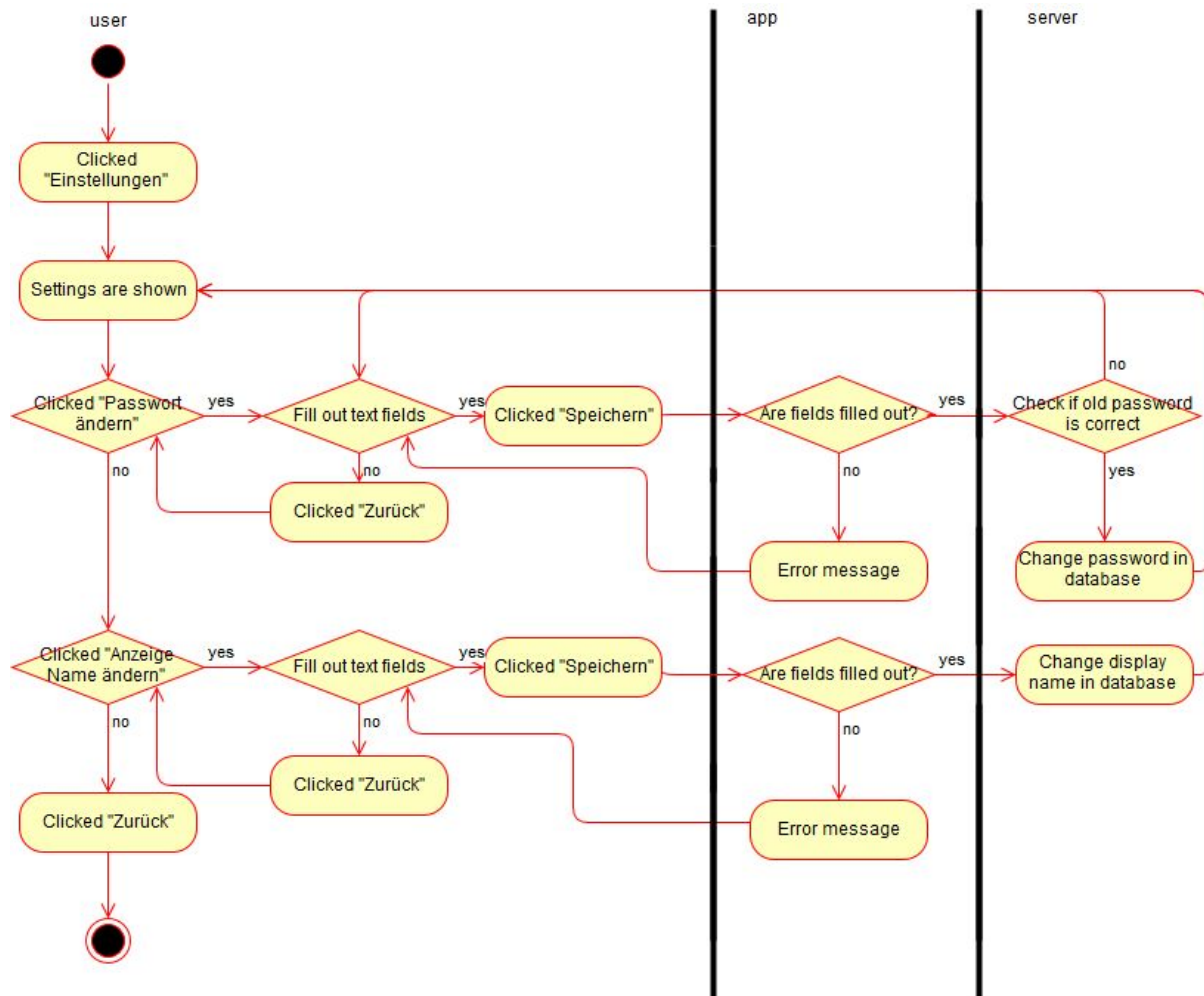

1.2 Mockup

2. Flow of Events

2.1 Basic Flow

For the user it is possible to change his password and also his display name. When he does not fill out the fields when he clicked on one opportunity he always can back to the settings.

2.1.1 Narration

Feature: Change Settings

As a logged in user

I want to change my settings

Scenario: change password works fine

Given I started the app

And I am logged in

When I click the button "Einstellungen"

And I click the button "Passwort ändern"

And I fill out all required fields

And I click "bestätigen"

And all input fields are valid

Then I want the password to be changed

But if one input element is not valid

Then The password should not be changed

And I must correct the invalid input fields

Scenario: change display name works fine

Given I started the app

And I am logged in

When I click the button "Einstellungen"

And I click the button "Name ändern"

And I fill out all required fields

And I click "bestätigen"

And the display name is available

Then I want the display name to be changed

And I want the name in the public highscore to be changed

But if the display name is not available

Then The name should not to be changed

Scenario: Cancel change the password

Given I started the app

And I am logged in

When I click the button "Einstellungen ändern"

And I click the button "Passwort ändern"

And I fill in the required fields

And I click "abbrechen"

Then I want to see the "Einstellungen" page

And I want the password not to be changed

Scenario: Cancel change the display name

Given I am logged in

When I click the button "Einstellungen ändern"

And I click the button "Name ändern"

And I fill in the fields

And I click "abbrechen"

Then I want to see the "Einstellungen" page

And I want my display name not to be changed

2.2 Alternative Flows

n/a

3. Special Requirements

n/a

4. Preconditions

The use has to be logged in.

5. Postconditions
